## COMMODITY TRADE BY INDUSTRIAL SECTOR WITH JAPAN

### Historical Summary 1966-1981

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1981. The tabulations show total exports (including re-exports), total imports and re-exports customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1980" issued by the Economic Intelligence Branch, Economic Policy and Analysis, Department of Industry, Trade and Commerce in July 1981.
